TRIVEDI AARSH

Ahmedabad, Gujarat | trivediaarsh51@gmail.com | LinkedIn | GitHub | Portfolio
LetsDefend | TryHackMe | Credly | Medium

PROFESSIONAL SUMMARY

Final-year B.Tech CSE (Cyber Security) student with an AI & ML diploma (Gold Medalist), focused on SOC operations and threat analysis. Hands-on practice in alert triage, log analysis, network traffic analysis, threat detection and incident response, with a top 5% TryHackMe rank and 87% success rate on LetsDefend SOC labs. Built a PCAP threat detection platform and contributed to a forensic Graph RAG system as an AI security intern. Seeking an entry-level SOC / MDR threat analyst role.

EDUCATION

Rashtriya Raksha University, Gandhinagar, Gujarat *Graduation: 2027*
B.Tech CSE with specialization in Cyber Security | CGPA: 8.17

Lok Jagruti Kendra University, Ahmedabad, Gujarat *Graduated: 2024*
Diploma in Artificial Intelligence & Machine Learning | CGPA: 8.73 | Gold Medalist

TECHNICAL SKILLS

Operating Systems: Linux (Kali, Ubuntu Server, Debian), Windows (Sysmon, Windows event logs, WDAC, Sysinternals Suite)

Programming & Automation: Python, Bash, SQL (PostgreSQL), FastAPI, Scapy, Docker, Jenkins, Git/GitHub

Network Security & Analysis: Wireshark, Nmap, Snort and Suricata (IDS/IPS), pfSense, Packet Tracer, GNS3, DPI, TCP/IP, DNS, TLS, routing and switching

Vulnerability Assessment: OWASP ZAP, Metasploit, Nmap, OS and service hardening

Threat Detection & SOC: Alert triage, log analysis, threat hunting, incident response, IOC research, threat intelligence, MITRE ATT&CK, Cyber Kill Chain, PCAP analysis, network forensics

EXPERIENCE

AI Security Research Intern | Photon Security *Aug 2026 – Sep 2026*

- Contributed to a Graph RAG digital forensics system with multilingual semantic search and evidence retrieval across English, Hindi and Gujarati.
- Implemented document processing, evidence extraction, retrieval and query pipelines for investigative workflows.
- Researched OCR-based processing of image evidence and forensic data analysis.

PROJECTS

PacketIntel: PCAP Analysis & Automated Threat Detection Platform

- Built a full-stack network forensics platform for PCAP analysis, live capture, traffic monitoring and automated threat detection.
- Developed backend services with Python, FastAPI, Scapy, SQLAlchemy and PostgreSQL, with JWT/OAuth2 authentication and detection logic for network anomalies.
- Built a React/TypeScript dashboard for packet exploration and real-time monitoring; containerized with Docker.

ACHYUTA: Zero Trust Architecture Engine for Windows Endpoints

- Designing an engine that continuously evaluates every request (Identity → Evidence → Risk → Policy → Decision → Enforcement) instead of trusting by default, using Sysmon and WDAC.
- Built an evidence-based risk-scoring model and a policy engine with lifecycle gating (Draft to Active).
- Modeled a trust-state machine with append-only, request-to-enforcement audit lineage for full explainability.

Home Lab & SOC Practice: Hardening, Monitoring and Alert Triage

- Built a segmented VMware lab (Kali, Ubuntu, Debian) with pfSense and Snort IDS for hardening and defensive monitoring.
- Hardened SSH, web and system services, tightened pfSense rules, and scanned with Nmap to find misconfigurations; verified fixes via logs and captures.
- Triaged simulated SOC alerts (SIEM, EDR, log management) on LetsDefend: 87% success rate, 3399 points, case notes documented.

VOLUNTEERING & LEADERSHIP

CTF Host and Challenge Organizer (OSINT) *Jul 2026 – Sep 2026*
National OSINT Commandos Training | Volunteer

- Hosted an OSINT Capture the Flag for a national, roughly three-month training program.
- Handled challenge design, flag validation, scoring and live participant support; coordinated scheduling, rules and communication with organizers.
- Helped trainees apply geolocation, social media, image and domain research techniques competitively.

Event Volunteer | Smart India Hackathon (SIH), College Chapter *2025*

CERTIFICATIONS & ACHIEVEMENTS

Cisco: CCNA: Introduction to Networks | CCNA: Switching, Routing, and Wireless Essentials
Cisco: CCNA: Enterprise Networking, Security, and Automation | **HackerRank:** Python Basics
SOCRadar: Mastering Threat Intelligence for SOC Analysts | **LetsDefend:** SOC Analyst Learning Path
Other: Red Team Leaders: CRTOM (Dec 2025) | Hack & Fix: CPPS | Coursera: Bash Shell Scripting
Achievements: TryHackMe top 5% (116 rooms) | Huntress CTF: 802 of 6951 teams | Hacktoria OSINT CTFs
